

## Staff & Expert

Our experience in metallurgical engineering is supported by a network of academicians especially from Institut Teknologi Bandung (ITB) in related engineering disciplines, including mechanical and process engineering. These associations permit us to offer a multi-disciplinary approach to problem solving, enabling us to provide a range of engineering services to clients. Our principal engineers received masters and bachelor degree from Institut Teknologi Bandung (ITB) and has had experienced of wide ranging industrial materials processing, metallurgy, welding, engineering analysis, quality assurance, manufacturing, accident investigation, forensic science investigation, and root cause failure analysis experience. This includes aluminum, steel, stainless steels, titanium, copper, nickel base, and other exotic alloys used in petrochemical plants, industrial machinery, automotive components, food processing equipment, ASME boilers and pressure vessels, and oil and gas pipelines. Our team of engineers, technicians, and administrative staff, is dedicated to providing timely and cost-effective service. We aim to continuously improve the scope and quality of services using the latest technology to meet or exceed our customer's expectations. List of Expert:

Dr. ir. Slameto Wiryolukito

Dr.ir. Husaini Ardy

Dr.ir. Arif Basuki

Dr.ir. Hermawan Judawisastra

Dr.ir. Achmad Sulaiman
